

The 1st Cloud Runtime Security Summit

CADR:CON

SPEAKERS

Namrata Shah
AI Distinguished AI
Thought Leader
(AWS Hero)
[Private](#)

**Dr. Chase
Cunningham**
VP of Cybersecurity
Market Research
[G2](#)

Shauli Rozen
CEO and Co-Founder
[ARMO](#)

Jim Rutt
CIO/CISO
[Dana Foundation](#)

Ray Lipps
VP, Cyber Security
Advisor, Field CISO
[Citrix](#)

**Jorick van der
Hoeven**
Head of Data &
Analytics
[Revolut](#)

Srini Masanam
Global Head of Data
Quality and
Governance
[Citi](#)

Namrata Shah
Managing Director -
Global Head of
Engineering -
Investment
Technology
[Nuveen](#)

Melody Balcet
CEO, WGI
Corporation / Former
Head of Digital,
Resilience.

April 16, 2025

Eastern Time

Welcome & Registration

8:30 AM-9:00 AM

Opening Remarks

9:00 AM-9:15 AM

VISION VOICES

**From Posture to Protection: Why Runtime Is the
Heart of CADR**

9:15 AM-9:40 AM

Posture identifies risk, but only runtime detects and stops real threats. Without a presence in runtime, detection is incomplete, and response is impossible. This talk breaks down why runtime is the heart of CADR, ensuring real-time visibility, detection, and action to protect cloud workloads where it matters most.

PANELISTS

**Dr. Chase
Cunningham**
VP of Cybersecurity
Market Research
[G2](#)

KEYNOTE

9:45 AM-10:20 AM

A New Era in Cloud Runtime Security: Cloud Application Detection & Response

Detecting and responding to cloud attacks has never been more challenging. Modern attacks and the ever-changing nature of cloud infrastructure and applications make security teams' lives more difficult than ever. A new approach is needed - one that can provide a fully traceable & explainable runtime security story spanning the entire cloud technologies stack.

PANELISTS

Shauli Rozen
CEO and Co-Founder

Networking Break

10:20 AM-10:40 AM

PANEL

10:40 AM-11:25 AM

The Modern CISO Strategy and Priorities: Protecting Cloud Infrastructures and Applications Against Modern Attacks

In recent years, we have added more and more tools to protect our cloud infrastructures and applications, but are we really more secure?

Traditionally, we started with the cloud security posture, but was that the right move?

The cloud security market has grown and changed significantly - from CSPM, to ASPM and CNAPP. It seems that every few months a new category is popping up. But what is still missing? Where should we focus next? posture or runtime? shift left or protect right?

CHAIR

Melody Balcet
CEO, WGI
Corporation / Former
Head of Digital,
Resilience.
