## REIMAGINING THE PERIMETER: EXECUTIVE VULNERABILITIES AS A CORPORATE THREAT

 **September 30, 2025**

5:30 PM-9:00 PM

Pacific Time

The digital and physical lives of executives are increasingly being targeted by sophisticated adversaries, creating a new and expanded attack surface that poses a direct threat to corporate infrastructure. As part of this event, we will explore the methods used by threat actors to exploit personal vulnerabilities to facilitate corporate breaches. We will discuss together and analyze real-world scenarios where attacks on executives have led to significant data breaches, highlighting the need for a fundamental shift in cybersecurity strategy. The facilitated conversation will delve into what enterprises are doing to adapt to this new normal by exploring what proactive measures are being adopted or designed to secure the personal digital lives of executives with high-profiles. The discussion will provide actionable insights for implementing holistic cybersecurity frameworks that seamlessly integrate executive protection into the organization's broader security posture. Join us to learn how to fortify your organization against modern threats by addressing the critical link between the personal security of your leaders and the resilience of your corporate assets.
