## WHY THE WORLD NEEDS NEXT-GEN SD-WAN AND SASE

**January 13, 2022**

5:30 PM-9:00 PM

Eastern Time

Work is no longer a place we go - it's something we do - anywhere, anytime. Similarly, the infrastructure that runs our applications and stores our data is no longer all located within our own four walls - more often, it is delivered as a service. Today, we have a unique opportunity to rearchitect our networks to be as flexible and scalable as we need; to reimagine security as something built-in rather than bolted-on; and to put the user at the center of everything, creating countless possibilities and enabling the future of work. Join an elite group of leaders to learn more about SASE's place in today's cloud era.
