OPERATIONAL RESILIENCE IN AN AI-DRIVEN WORLD

October 07, 2025

6:00 PM-9:30 PM

Central European Time

As organizations navigate the AI revolution and increasing automation, our latest data reveals a striking reality: 51% of companies have already deployed AI agents, with 86% expected to be operational by 2027, fundamentally reshaping how organizations automate, operate and innovate. Join a select group of executive peers for an evening of candid conversation on how to lead through this transformation. This gathering offers a unique opportunity to share real-world strategies and insights about building resilient teams that leverage both human expertise and AI-driven automation during this transformative period in digital operations.
