Bridging the Gap: Mastering the Art of Business-Technology Harmony

Bridging the gap between business and technology is not easy and requires discipline and balance between technology, people, and the business. For so many organizations today, technology is the business. Technology needs to be understood as a critical enabler in every part of the organization from the front line to the back office. It creates new value by crunching data to deliver new insights, it spurs innovation, and it disrupts traditional business models. For business and technology leaders alike, new actions and behavioral changes can help their organizations make this shift. CIOs must take responsibility for problems, they should convey that when technology fails, many people typically share responsibility.

10:10 AM-10:35 AM

Data Revolution Leadership: CIOs at the Helm of Modernization for Strategic Value

This session explores the pivotal role of CIOs in modernizing data to unlock its full value. In the contemporary digital landscape, data stands as a strategic asset, and CIOs are at the forefront of harnessing its potential. The abstract emphasizes the CIO's responsibility in implementing cutting-edge technologies and data management strategies that go beyond mere storage, enabling organizations to derive actionable insights. By adopting innovative approaches, such as advanced analytics, artificial intelligence, and cloud solutions, CIOs can transform data into a valuable resource, driving efficiency, innovation, and informed decision-making across the enterprise. The discussion delves into the evolving responsibilities of CIOs in leading the charge towards data modernization, ensuring organizations remain competitive and agile in an increasingly data-centric world.

PANEL

10:55 AM-11:40 AM

Elevating Agility: The Strategic Imperative for CIOs in Prioritizing Cloud Engineering

In this session, we delve into the imperative for CIOs to prioritize cloud engineering in the contemporary digital landscape. As organizations increasingly rely on cloud computing for operational efficiency and innovation, CIOs play a central role in shaping robust strategies. The session emphasizes the strategic importance of cloud engineering in optimizing infrastructure, ensuring scalability, and fostering agile application development. Attendees will explore practical approaches to resource management, automation, and aligning cloud initiatives with overarching business goals. The discussion navigates the evolving realm of cloud technologies, highlighting how CIOs can strategically prioritize cloud engineering to drive competitiveness and resilience in the dynamic digital ecosystem.

VISION VOICES

11:15 AM-11:30 AM

Unleashing Innovation: CIOs Driving New Business Models through Scalable GenAI

In this dynamic session, we explore the symbiotic relationship between business evolution and the strategic role of Chief Information Officers. Focused on scaling generative artificial intelligence (GenAI) for new business models, the discussion delves into how CIOs can harness the transformative power of AI to drive innovation and reshape business paradigms. Participants will gain insights into practical approaches for integrating scalable GenAI solutions, exploring its potential to revolutionize operational efficiency, customer engagement, and overall competitiveness. The session places a spotlight on the pivotal role of CIOs in navigating the intersection of technology and business strategy, showcasing how they can spearhead initiatives that propel organizations into the next frontier of success.

VISION VOICES

11:35 AM-11:50 AM

Internet of Things (IoT) integration

As businesses increasingly adopt the Internet of Things (IoT) to optimize operations and improve customer experience, CIOs play a critical role in evaluating the benefits and risks of IoT adoption. They must carefully assess the security risks associated with IoT devices and ensure data security is adequately addressed. Furthermore, CIOs must possess the necessary expertise to effectively integrate IoT devices with existing systems and address issues related to data management, network connectivity, and interoperability. By taking a strategic approach to IoT adoption, CIOs can help their organizations unlock the full potential of this transformative technology while mitigating risks and ensuring data security.

Lunch & Disruptor Showcase

11:50 AM-12:50 PM

LUNCH & DISRUPTOR SHOWCASE

Innovation Unleashed: Navigating the Future through IT Evolution with CIOs at the Helm

12:30 PM-12:45 PM

In this session, embark on a transformative exploration of the evolving landscape of IT operations. Delving into the strategic imperative for Chief Information Officers to reshape and modernize their IT operating models, the discussion unfolds the critical role technology plays in driving business success. Participants will gain practical insights into the adaptive strategies CIOs can employ to enhance organizational agility, foster innovation, and align IT with overarching business goals. Join us for a dynamic conversation that unveils the power of evolving IT operating models, empowering organizations to thrive in the ever-evolving digital age.

VISION VOICES

Revolutionizing Tomorrow: A Deep Dive into Innovation through Emerging Technologies

12:50 PM-1:35 PM

In this strategic session designed for Chief Information Officers (CIOs), we delve into the transformative realm of "Innovate through Emerging Tech." As technology stewards, CIOs play a pivotal role in navigating the rapidly evolving landscape of emerging technologies—such as artificial intelligence, blockchain, and the Internet of Things. The session provides CIOs with actionable insights into leveraging these technologies to drive innovation within their organizations. Attendees will explore practical strategies for implementation, addressing potential challenges, and ensuring ethical considerations in adopting these disruptive technologies. Join us to empower your role as a technology leader and discover how CIOs can strategically leverage emerging tech to propel their organizations into the forefront of innovation.

Fostering Digital Trailblazers: A Strategic Imperative for CIOs in 2024

1:40 PM-2:15 PM

Addressing the multifaceted challenges faced by CIOs in the contemporary technological landscape, the imperative to develop transformational leaders takes center stage. The heightened demand for innovation, enterprise-wide transformation, and evolving technology capabilities poses significant hurdles for CIOs, often leading to an overburdened IT department. To navigate this complexity, the focus shifts towards fostering digital transformation leaders, referred to as digital trailblazers. Gartner highlights leader and manager development as a top priority for HR in 2024, emphasizing the need for CIOs to collaborate with HR in tapping into training and development programs. By cultivating leaders skilled in transformation and change management, CIOs can enhance their department's capacity to oversee initiatives, standardize platforms, and deliver faster results, ultimately reducing friction to change within the organization. Looking ahead to 2024, this strategic approach becomes essential for CIOs seeking to strike the right balance in their digital transformation programs, avoiding the pitfalls of overpromising and under delivering.

VISION VOICES

The Future of Digital Strategy in a Rapidly Evolving Landscape

2:20 PM-2:35 PM

The future of digital strategy in a rapidly evolving landscape is poised to be both dynamic and transformative. As technology continues to

advance at an unprecedented pace, organizations must adapt their digital strategies to stay competitive and relevant. Data-driven decision-making, AI and machine learning integration, and a seamless user experience will be at the forefront. With the growing importance of sustainability and ethical considerations, digital strategies will also need to incorporate responsible practices. Furthermore, the rise of new platforms and communication channels, such as virtual reality and augmented reality, will require businesses to be agile and innovative in their approach. Success in this evolving landscape will depend on a proactive and flexible approach to digital strategy, ensuring that organizations can not only keep up with change but also lead in shaping the digital future.

What's AI Doing for You?

2:55 PM-3:10 PM

The terms "Artificial Intelligence" and "Advanced Machine Learning" are often thought of interchangeably. While there is a relationship between AI and AML, to say they are the same thing is an oversimplification and misclassification. Rather, one begets the other with AI being the basic principle upon which AML is developed. As AI begins to mature and migrate away from purely advanced mathematical operations into decision making paradigms, AML steps forward as the predictive ability of machines to process vast quantities of data. As data and analytics becomes foundational to the way every business operates, AI and AML will become foundational capabilities.

VISION VOICES

Modern Pioneers: Navigating Digital Transformation in 2024

3:15 PM-3:30 PM

CIOs play a crucial role in driving their organization's digital transformation efforts. The COVID-19 pandemic has accelerated the adoption of digital technologies, and CIOs must continue to lead the way to stay competitive and meet the evolving needs of customers and employees. This requires a deep understanding of the organization's goals, processes, and IT infrastructure, as well as collaboration with other business leaders. By successfully leading digital transformation, CIOs can position their company for long-term success in a digital world.

VISION VOICES

Strategic Shifts: Reimagining Engineering Talent Deployment and Management in the Age of GenAI

3:35 PM-4:10 PM

Unlock insights into the evolving landscape of talent deployment and retention as board expectations drive CIOs to rethink traditional IT talent models. Explore the impact of GenAI on coding processes and the software engineering lifecycle, and discover strategies for optimizing talent allocation and headcounts. Gain actionable insights into defining new roles, cultivating essential skills, and charting GenAI-centric career paths to align with organizational goals and stay ahead in a rapidly changing technological landscape.

Resilience Isn't Motivation: A System for High-Pressure Life and Work

Endurance athlete and corporate lawyer Dmytro Moyseyev presents a practical, evidence-informed framework for resilience shaped by extreme endurance challenges, including a 570km run across Ireland in 138 hours and 50 marathons in 50 consecutive days. Following a life-threatening medical crisis, he rebuilt trust in his body and developed a systematic method for operating under sustained stress and uncertainty. Moving beyond motivational “grit” narratives, this keynote translates resilience into repeatable principles for demanding professional settings: maintaining momentum under pressure, designing systems that reduce reliance on willpower, recovering strategically to prevent burnout, and sustaining performance through purpose and meaning. Attendees leave with clear tools they can apply immediately—personally and professionally.

The Next Wave Agentic AI: Control, Collaboration, and the Future Frontier of Automation

Agentic AI, autonomous systems that perceive, reason, and act with minimal human intervention is poised to redefine how work gets done. As these intelligent agents move beyond experimentation into enterprise-scale deployments, organizations must prepare to fundamentally rearchitect their digital environments.

This panel will explore how leaders can operationalize agentic AI to drive efficiency, creativity, and strategic advantage while preserving oversight, governance, and trust. Discussion topics will include designing workflows around autonomous decision-making, managing human-agent collaboration, and navigating emerging risks such as bias, security, and operational drift. Join us as we unpack what it truly means to lead in an era of intelligent, action-oriented AI and how to ensure these agents serve both your innovation goals and core business values.

The Human Advantage in 2026: Why Soft Skills Are Tech's and Cybersecurity's Greatest Competitive Advantage

2026 is an era dominated by digital transformation, AI, and automation, it's easy to overlook the one constant that truly drives progress: people. Technology may enable change, but leadership—and impact come from human connection. As roles evolve and teams become increasingly cross-functional, skills like listening, influence, adaptability, and collaboration are now as critical as technical expertise. Today's CIOs, CISOs, and technology leaders are expected to do more than deliver innovation. They must communicate across the business, lead diverse teams, and navigate uncertainty with clarity and empathy. Emotional intelligence, storytelling, active listening, and resilience are no longer optional—they are core leadership capabilities in a fast-moving, high-stakes environment.

This shift is especially evident in the UK and uniquely so in London, a place defined by creativity, reinvention, and cultural diversity. In London, the ability to connect across perspectives isn't just a professional advantage; it's a necessity. As technology and business continue to converge, the city provides a powerful backdrop for exploring how human-centered leadership is shaping the future of tech.

FIRESIDE CHAT

12:25 PM-1:00 PM

The Future of Cyber Resilience: Winning in a World of Constant Threats

In an era of escalating cyber threats, evolving attack surfaces, and accelerated digital transformation, traditional security models are no longer enough. This keynote will explore what it means to build cyber resilience in today's complex environment—where speed, adaptability, and business alignment are paramount. From securing hybrid and multi-cloud environments to integrating AI-driven threat intelligence, we'll examine how leaders can future-proof their security strategies while enabling innovation. Learn how to shift from reactive defense to proactive resilience, ensuring your organization can not only withstand but thrive amid disruption.

PANEL

2:00 PM-3:00 PM

Agentic AI and Security: Trust, Control, and Resilience in Autonomous Systems

As agentic AI systems evolve from experimental tools to enterprise-grade digital workers—capable of making decisions, taking actions, and adapting in real time—they introduce a new paradigm of both possibility and risk. Unlike traditional automation, agentic AI operates with greater autonomy, raising urgent questions for security leaders: How do we ensure control? How do we manage risk when systems learn, act, and adapt independently?

This panel will explore the security implications of deploying agentic AI across business operations—from data privacy and decision integrity to real-time threat mitigation and adversarial AI risks. We'll dive into the intersection of governance, identity management, and AI observability, and how CISOs can build frameworks that safeguard both the systems and the outcomes.

Cybersecurity Trends in 2026 - Follow the Money!

Most trend forecasts rely on vibes, but in times of complexity and noise, the clearest throughline is still to "follow the money". This session will trace where tech and cybersecurity investments have recently flowed to steer the industry, and how cybercriminals have been monetizing their operations to shape the threat landscape. By comparing industry funding patterns with the financial incentives driving threat actors, we'll highlight the real forces influencing cybersecurity in 2026 and where defenders should focus next.
