APPLICATION SECURITY IN A DEVOPS, CLOUD AND API WORLD

March 09, 2022

5:30 PM-9:00 PM

Eastern Time

Security teams are challenged to modernize application security practices in light of accelerating shifts to DevOps delivery models and rapid adoption of cloud-native application designs. Applications built on microservices (e.g. serverless, containers, APIs) and delivered continuously are outpacing application security teams ability to secure them. CISOs need to consider new skills, new touch points and new platforms to maintain a strong security posture in light of these trends and the speed at which they are re-shaping IT.

PANELISTS

Robert Smith
Field CISO
Noname Security

Chris Patterson
Director of IT/IS
Florida Orthopaedic
Institute

Doug Jordan
Director
Joint Special
Operations
University

Janet Stringfellow
President/CEO
VOA Florida
