

# AI-Driven Digital Operations: Boosting Productivity, Automation, and Innovation

# CIO Council

## SPEAKERS

**Mohamed Elhoriny**  
Engineering Manager  
Tenneco

**Marcus Siefertmann**  
Director HV Harness  
Engineering  
DRÄXLMAIER Group  
Companies

**Haifeng Ling**  
VP Industrial  
automation  
Moxa Inc.

**Bernhardt  
Lueddecke**  
Director Validation  
Global  
Kautex Textron

**Arber Qesja**  
Deputy Unit Head  
DENSO

**Herwig Aigner**  
Group Senior  
Manager IT  
Governance  
ZKW

**Piotr M. Klim**  
Pricing Director  
Universal Robots

**Stefan Badura**  
Director Engineering  
Grammer AG

## AI-DRIVEN DIGITAL OPERATIONS: BOOSTING PRODUCTIVITY, AUTOMATION, AND INNOVATION

November 28, 2024

2:00 PM-3:15 PM

United Kingdom Time

As industries navigate the complexities of digital transformation, AI-driven operations are becoming essential for maintaining agility and competitiveness. This discussion will bring together industry leaders to explore how artificial intelligence is revolutionizing operational processes by enhancing automation, streamlining workflows, and improving incident response. By leveraging AI, businesses can predict and prevent operational disruptions, allowing teams to focus on strategic innovation rather than firefighting routine issues. The integration of AI into digital operations accelerates productivity and enables real-time decision-making, ensuring that organizations can respond swiftly to market changes, manage risks, and meet rising customer expectations. In this session, we'll dive into how AI can optimize both human and machine efficiency, reduce operational silos, and foster a culture of proactive problem-solving. Together, we'll exchange insights and learn from each other's experiences on how to build resilient digital frameworks that not only respond to today's challenges but also unlock future growth opportunities.

## PARTNERS

*We are currently accepting partnership opportunities for this event.*
