

# Accelerating Data Migration to Cloud Platforms: Ensuring Quality, Scalability, and Governance at Scale

## Executive Council

### SPEAKERS

**Amresh Mathur**  
SVP Digital Transformation  
Citi

**Shadaab Kanwal**  
MD of Digital, Data, & Analytics  
Charles Schwab

**Yael Gomez**  
Fractional CIO / CTO | Former  
Walgreens Boots Alliance

**Sachin Narang**  
Senior Director - Data Warehouse  
Tiger Analytics

**Subramanian Thangavel**  
Principal Architect - Data Warehouse  
Tiger Analytics

**Jonathan Regenstein**  
AI Principle for Financial Services  
Snowflake

**Sujay Mudalgi**  
Director, Data Management and Architecture  
Pacific Life

## ACCELERATING DATA MIGRATION TO CLOUD PLATFORMS: ENSURING QUALITY, SCALABILITY, AND GOVERNANCE AT SCALE

**January 30, 2025**

3:00 PM-4:15 PM

Eastern Time

As organizations increasingly rely on data to drive decisions, many are migrating to cloud-based platforms like Snowflake to overcome the limitations of traditional data warehouses. This shift is driven by the need for greater scalability and agility, and migrating to the cloud requires a strategic approach. First, organizations must develop a clear strategy for adopting the cloud and optimizing their data platforms, ensuring a smooth transition. Modernizing data engineering practices is essential, including building scalable data pipelines and employing advanced data modeling techniques to support complex analytical needs. Additionally, integrating AI and analytics capabilities into the cloud infrastructure is key, enabling predictive modeling, machine learning, and real-time insights. Finally, robust data governance and security frameworks must be established to protect sensitive data, ensure quality, and meet regulatory compliance.

## CHAIR
